

Knee Rehab Pros

Better Elevation. Better Outcomes.

Trusted by Clinicians. Loved by Patients.

A Smarter Way to Recovery After Knee Surgery

Many patients elevate their legs using bent knees, unstable pillows, or outdated CPM machines, resulting in increased swelling, discomfort, and slower recovery. Our positioners provide a smarter, more effective solution that patients not only use—but request again.

WHY CLINICS CHOOSE OUR POSITIONERS

- Supports full terminal knee extension
- Helps control leg rotation for proper healing
- Promotes swelling reduction with optimal straight-leg elevation
- No shifting or fluff—stays securely in place.
- Comfortable, lightweight, and easy to use
- Clinician-approved and proudly made in the USA

APPROVED BY CLINICIANS. LOVED BY PATIENTS. BUILT FOR BETTER RECOVERY.

Elevate your recovery protocol with a solution that improves outcomes—and keeps patients comfortable.
